

# PROFESSIONAL REMOTE TECH SUPPORT

Secure - Fast - AI-Assisted - Your Digital Problem Solver

I provide expert remote IT support using secure, industry-standard tools (e.g. AnyDesk) and AI-assisted diagnostics. Fast, privacy-first troubleshooting for home users and small businesses. Clear explanations and follow-up recommendations.

## Core Services

- PC Optimization & Speed Boost — cleanups, startup tuning, system tweaks for noticeable performance improvements.
- Software Installation & Updates — OS, drivers, browsers, office suites and security software.
- Driver & Peripheral Setup — printers, GPUs and accessories with stable driver installs.
- Email & Account Support — Gmail, Outlook and mail client sync/config issues.
- Virus & Malware Removal — deep scans, safe removal, and practical prevention advice.
- Troubleshooting & Error Repair — crashes, freezes, blue screens and application errors.
- Network & VPN Setup — Wi-Fi fixes, router optimization, speed troubleshooting and secure VPN configuration.
- Backup & Recovery Guidance — backup planning and step-by-step recovery assistance.

## Transparent Pricing

Service Tier	Starting From	What's Included
Basic Fix	\$15	Quick tune-up, minor troubleshooting (short remote sessions)
Standard Support	\$35	Deep scans, installations, driver updates, extended sessions
Premium Session	\$80	Security audit, unattended setup, complex recovery

I work remotely using secure tools (AnyDesk / similar). Sessions are privacy-respecting and controlled by you. If you have sensitive data, we'll agree a safe process beforehand. Available worldwide via Fiverr gig messages.

Ready to fix it? Order via my Fiverr gig or send a message — fast response and professional support.
